UNIAL

# MISCELLANEOUS

*Universal electrical jointing paste is a unique electrical jointing compound, formulated to prevent galvanic corrosion and enhance connections in electrical joints.*

*Unial is especially effective when used on Aluminium to Aluminium and Copper to Aluminium connections. Unial is a neutral grease which inhibits corrosion and is especially recommended for use in compression joints.*

*Unial, once known as Densal, is a creamy textured yellow paste based on a Calcium, Lithium, Petroleum grease, with the addition of Titanium Dioxide which enhances the electrical performance of the joint, and Zinc Tetraoxy Chromate to prevent oxidation and promote long term stability.*

*Unial is used in a wide range of applications where permanent low-resistance joints are vital. These include overhead line conductor connections, cable jointing, transformer and switchgear connections, lightning conductors and many more.*

*Unial is supplied in packs of 250 gram cans or packs of 1kg cans and 25kg kegs.*

*Unial is available from stock and can be supplied on a next day delivery as required. Please call for further information on Health & Safety and instructions for use.*
